

Project 3 - SQL Data Analysis

Objective

The objective of this project is to perform SQL-based analysis on a sales dataset and extract meaningful business insights using SQL queries.

Dataset

The dataset contains sales transaction information including:

- OrderID
- Date
- CustomerID
- Product
- Quantity
- UnitPrice
- PaymentMethod
- OrderStatus
- ReferralSource
- TotalPrice

Tools Used

- MySQL Workbench
- SQL
- GitHub

SQL Concepts Used

- SELECT
- WHERE
- ORDER BY
- GROUP BY
- HAVING
- Aggregate Functions (SUM, AVG, COUNT, MAX, MIN)

Analysis Performed

1. Total Revenue Analysis
2. Average Order Value
3. Revenue by Product
4. Revenue by Referral Source
5. Revenue by Payment Method

6. Orders by Status
7. Revenue by Year
8. Top Performing Products

Key Insights

- Identified top revenue-generating products.
- Evaluated the effectiveness of referral sources.
- Analyzed customer payment preferences.
- Examined order status distribution.
- Measured yearly revenue trends.
